

Dead Lock City – Gameplay Testing Report

Tester: BODDU VINAY CHANDRA

Date: 11-03-2026

Test Environment

Device: Vivo V30e

Operating System: Android 15

Game Version: 1.0

Network: Jio

Testing Mode: Manual Gameplay Testing

Test Scope

This testing session focused on **Level 1 gameplay testing** including player movement, combat interactions, zombie behavior, performance stability, control responsiveness, and audio feedback.

The objective of this testing was to identify gameplay issues, control bugs, performance problems, and audio irregularities that may affect player experience.

Bug Report Summary

During Level 1 testing, multiple issues were identified related to **player controls, gameplay mechanics, performance stability, and audio behavior**.

The following sections describe each issue in detail with reproduction steps and expected behavior.

Video evidence for all bugs is provided in the **Google Drive folder attached with this report**. Videos are labeled according to the bug numbers and names.

High Priority Issues

Bug 1 – Joystick Not Working After Pause/Resume

Description

After pausing the game and resuming gameplay, the joystick control becomes unresponsive. The player character remains stationary and cannot move using the joystick input.

Steps to Reproduce

1. Launch the game.
2. Start Level 1 gameplay.
3. Press the Pause button.
4. Select Resume to continue gameplay.
5. Attempt to move the character using the joystick.

Expected Result

The joystick should respond normally and allow the player to move immediately after resuming the game.

Actual Result

The joystick does not respond and the player character remains stuck in the same position.

Impact

This issue prevents the player from controlling the character, making the game temporarily unplayable until restarting gameplay.

Severity: High

Bug 2 – Player Stuck When Zombies Surround

Description

When multiple zombies surround the player character, the player becomes completely stuck and cannot move in any direction.

Steps to Reproduce

1. Start Level 1 gameplay.
2. Allow several zombies to gather around the player.
3. Attempt to move in any direction.

Expected Result

The player should still be able to move or push through enemies to escape.

Actual Result

The player becomes stuck and movement is restricted.

Impact

This issue creates situations where the player cannot escape Zombies attacks.

Severity: High

Bug 3 – Lag When Rotating Screen and Firing Gun

Description

Noticeable lag and frame rate drops occur when rotating the screen during gameplay. The issue becomes more noticeable when rotating the camera while firing the weapon, but lag can also occur during normal camera rotation without shooting.

Steps to Reproduce

1. Start Level 1 gameplay
2. Rotate the screen normally during gameplay
3. Observe the performance behavior
4. Repeat the same action while firing the gun

Expected Result

Camera movement and shooting should remain smooth without performance drops.

Actual Result

Gameplay becomes laggy and frame rate drops occur when rotating the screen. The lag becomes more noticeable when rotating the camera while firing the weapon.

Impact

This issue affects gameplay smoothness and may reduce combat responsiveness during action sequences.

Severity: High

Medium Priority Issues

Bug 4 – Aim Assist Not Working Properly

Description

The aim assist system does not consistently help the player target zombies during combat.

Steps to Reproduce

1. Start Level 1 gameplay.
2. Aim at zombies during combat.
3. Observe aim assist behavior while shooting.

Expected Result

Aim assist should help track nearby enemies and improve targeting accuracy.

Actual Result

Aim assist behaves inconsistently and sometimes fails to assist the player.

Impact

This reduces the effectiveness of the aiming system and may make combat less smooth for players.

Severity: Medium

Low Priority Issues

Bug 5 – Repetitive Zombie Sound Loop

Description

Zombie sound effects repeat continuously during gameplay, when multiple zombies are nearby.

Steps to Reproduce

1. Start Level 1 gameplay.
2. Allow several zombies to approach the player.
3. Listen to zombie sound effects during combat.

Expected Result

Zombie sound effects should trigger at natural intervals without excessive repetition.

Actual Result

Zombie sounds repeat frequently and may become distracting during gameplay.

Impact

Continuous repetitive sound effects may affect player immersion.

Severity: Low

Video Evidence

Video recordings demonstrating each bug are available in the following folder:

Google Drive Folder: <https://drive.google.com/drive/folders/1ZFRdLonNwu0c8-NmZSzuPE-Mf1mv655A?usp=sharing>

All videos are named according to the bug numbers and names mentioned in this report.

Conclusion

During Level 1 gameplay testing, several issues related to **player controls, movement mechanics, performance stability, and audio behavior** were identified.

Addressing these issues may improve gameplay responsiveness, performance stability, and overall player experience.

Further testing of additional levels and gameplay features may reveal additional issues.
